

Osteoporosis Assessment

Rescheduled from 2020
Thursday 7th April 2022

Evelyn Suffield House
9.30am – 6.00pm
£25.00

Do you know if you are at risk of developing this condition? Would you like to know?

The **Osteoporosis Assessment Service** will be at Evelyn Suffield House offering **Ultrasound Bone Density Fracture Risk Assessments** using a heel ultrasound scanner. The scanner does not use x-rays.

Bone density measured in the heel is strongly related to the hip and spine and is an excellent surrogate scanning site for osteoporosis assessments.

Appointments are available in 15-minute slots
Covid-19 secure cleaning measures will be in place

The scan takes 3 minutes. A small amount of ultrasound gel is placed on a bare heel, and the results are printed and explained within a 10-minute appointment.

Please be advised that all events are subject to Government regulations for gatherings. The Federation cannot be held responsible for events that are cancelled or postponed

Allocation Date from Thursday 3rd February 2022
